Friday August 19th: Design Challenge and Plenary
Friday evening features a Plenary Opening, connecting the next generation of innovators with leaders in the field of biomedical engineering. Attendees will enjoy special access to the latest, cutting-edge biomedical innovations as select teams will showcase their work during the Student R&D Demo Workshop.

Saturday August 20th: Keynote and Interactive Workshop
Keynote talks on transformational science and engineering will present powerful examples of how technology is being applied to extend human health. Design Challenges will be explored by attendees together with mentors from leading research, clinical & industry organizations. Participate through workshops applied to multiple domains across Earth, Sea, Air, and Space. The day will culminate in a “World Café,” where teams will present their progress, share insights and exchange ideas for the future of health.
